Rules

Army Roster (Xenos - Orks)

Waaagh!

Friendly **ORKS** with this ability can:

- Re-roll **advance rolls**.
- Become **riled up**, as stated in other rules.

While a unit is **riled up**:

- That unit has 5+ **InSv**.
- That unit's ranged attacks have **[ASSAULT]**.
- When that unit is selected to make an **advance move**, that **advance move** does not prevent that unit from being **eligible to declare a charge**.

War Cry (Once per battle, per army)

At the start of the Command phase, you can use this ability. If you do, friendly **ORKS** units with the **Waaagh!** ability are **riled up** until the end of the next turn.

Da Boss:

At the start of the battle round, if a model with this ability is your **WARLORD**, gain 1CP.

Deadly Demise 1 / Deadly Demise D3:

This ability always takes the form **Deadly Demise X**. Each time a model in this unit is **destroyed**, after the units embarked within it (if any) have made their **emergency disembark moves**, roll one D6. On a 6, that model suffers a **deadly demise**; each unit within 6" of that model suffers a number of **mortal wounds** denoted by **X** (if this is a random number, roll separately for each unit within 6").

Example: *An Impulsor with a unit of Intercessors embarked within it is **destroyed** by ranged attacks. First, any unresolved attacks made by the attacking unit are resolved. Then the Intercessors make an **emergency disembark move**. Then the roll is made for the **Deadly Demise** ability, and on a 6, that ability is resolved. Finally, the Impulsor is removed from the battlefield.*

Firing Deck 12:

This ability always takes the form **Firing Deck X**. In your Shooting phase, each time this **TRANSPORT** is **selected to shoot**, if one or more units are embarked within it, resolve the following sequence:

1. Select up to **X** models embarked within this **TRANSPORT** (excluding models whose units have already been **selected to shoot** this phase).
2. For each selected model, select one of its ranged weapons (excluding **[ONE SHOT]** weapons).
3. Until this **TRANSPORT** has resolved all of its attacks, it has all of those selected weapons in addition to its other weapons.
4. Until the end of the turn, units embarked within this **TRANSPORT** are not eligible to shoot.

Infiltrators:

During deployment, if every model in a unit has this ability, it can be set up anywhere on the battlefield that is more than 8" horizontally from your opponent's deployment zone and all enemy units.

Leader:

Before the battle, in the Muster Armies step, for each leader and support unit in your army, you can select one friendly bodyguard unit that unit can lead. That unit will then lead that bodyguard unit for the battle and form an attached unit with it. Unless otherwise stated, each bodyguard unit can only have one leader unit and one support unit attached to it.

Lone Operative:

Unless part of an **attached** unit, this unit is not **visible** to enemy models unless they are within 12" of this unit, and it cannot be targeted by **[INDIRECT FIRE]** weapons unless the attacking model is within 12" of this unit.

If this ability takes the form **Lone Operative X"**, unless part of an **attached** unit, this unit is not **visible** to enemy models unless they are within **X"** of this unit, and it cannot be targeted by **[INDIRECT FIRE]** weapons unless the attacking model is within **X"** of this unit.

Mob-handed Brutality:

- Friendly **BOYZ** units' melee attacks have **[SUSTAINED HITS 1]**.
- If a friendly **ORKS INFANTRY** unit made a **charge move** this turn, that unit's melee attacks have **[LETHAL HITS: non-MONSTER/VEHICLE]**.

Stealth:

If every model in a unit has this ability, each time a ranged attack targets that unit, that unit has the **benefit of cover** against that attack (13.08).

Support:
Before the battle, in the Muster Armies step, for each **leader** and **support** unit in your army, you can select one friendly **bodyguard** unit that unit can lead. That unit will then lead that **bodyguard** unit for the battle and form an **attached** unit with it.
Unless otherwise stated, each **bodyguard** unit can only have one **leader** unit and one **support** unit attached to it.

Suspiciously Well Organised:
Friendly **STORMBOYZ** units have **BATTLELINE**.
- When a friendly **BOYZ/KOMMANDOS/STORMBOYZ** unit is selected to make an **fall-back move**, that **fall-back move** does not prevent that unit from being **eligible to declare a charge**.

Unstable Energies:
ORKS PSYKER units with this ability have a **psyker level** of 1 or higher, specified in that unit's abilities. Each **psychic ability** has a **psychic level** of 1 or higher, specified in that ability's name.
In a battle round, a friendly **ORKS PSYKER** unit can use a number of **psychic abilities** whose total **psychic level** does not exceed that **PSYKER** unit's **psyker level**.

Waaagh!:
Friendly **ORKS** with this ability can:
- Re-roll **advance rolls**.
- Become **riled up**, as stated in other rules.
  While a unit is **riled up**:
  - That unit has 5+ **InSv**.
  - That unit's ranged attacks have **[ASSAULT]**.
  - When that unit is selected to make an **advance move**, that **advance move** does not prevent that unit from being **eligible to declare a charge**.
